

Advertising Cost of Sales

$$\text{ACOS} = \text{ad spend} / \text{attributed sales} \times 100$$

Use spend and sales from the same currency, reporting window and attribution setting.

Block an exact value when attributed sales is zero or either input is missing.

This definition does not identify why ACOS changed and does not authorize an action.

EVIDENCE BOUNDARY

Project-authored synthetic values only. Not customer or platform evidence.

Interpretation and stop conditions

Known

The fixture ACOS changed from 28.4% to 36.9% across adjacent seven-day windows.

Unknown

Comparable CPC, CVR, price and availability evidence is absent.

Required response

Request evidence and keep every optimization as a manual draft.

Stop if windows or units differ, inputs are missing, or evidence conflicts.
